Recreational resources

- Glafirovsky beach is located on the eastern shore of the Sea of Azov
- Spring in honor of the “Unfading Flower” Icon of the Mother of God

The Azov Spits Nature Park

Area of protected areas: 5,958,0409 hectares.

Location of the protected area: Glafirovskoye and Shabelskoye rural settlements of Scherbinovsk district

The natural park's territory covers parts of the Sazalnikskaya and Glafirovskaya spits, along with the surrounding water area of Taganrog Bay and Yeisky Estuary. These clusters are sea spits bordered by the waters of Taganrog Bay and Yeisky Liman. They consist of marine sediments, including layers of sand, detritus, and shells.

The Green Islands, with their large colonies of gulls and copepods, and Lake Sazalnikskoye (Long, Dolgoye) are crucial for bird conservation in the region.

The natural park's territory is crucial for preserving the population of multicolored lizards, which are commonly seen on the Sazalnikskaya Spit.

The Azov Spits Nature Park is known for its rich variety and unique flora. It plays an important role in safeguarding plants listed in the Red Books of the Russian Federation and Krasnodar Territory.

The source in honor of the “Unfading Flower” Icon of the Mother of God

In the village of Yekaterinovka, on the low-lying, overgrown bank of the river Yeya, a spring of pure water was discovered in ancient times. It gained fame among the locals for its miraculous healing properties. It was named after the “Unfading Flower” Icon of the Mother of God, where the Mother of God is depicted with Jesus and a snow-white lily. The spring is well-known and respected in the area, serving as both a sacred site and an Orthodox attraction. People come here seeking health benefits, help in the fight against diseases, or out of simple curiosity.

Social and economic indicators

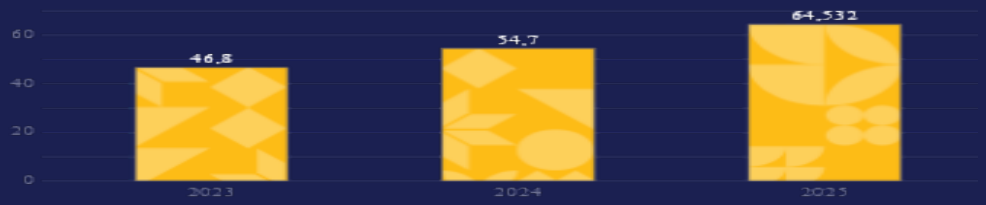

Volume of retail turnover, bln rubles

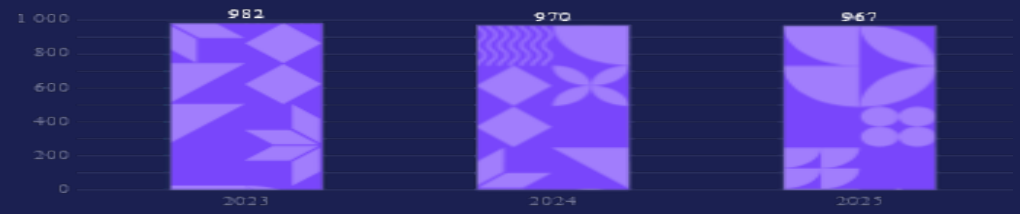

Shipment of products, bln rubles

Average salary of the population, thousand rubles

Number of small and medium-sized enterprises (SMEs)

Priority industries for attracting investments

Agro-industrial complex

Factors that make an industry attractive for investment

The economic potential of Scherbinovsk District relies heavily on agricultural production, which makes up over 70% of the district's key economic sectors. Crop production is primarily focused on growing grains, sunflowers, sugar beets, and fodder. The livestock breeding sector is experiencing dynamic growth.

The largest enterprises of the industry

SPK (collective farm) Znamya Lenina, OOO AF Novoscherbinovskaya, AO named after T.G. Shevchenko, OOO Blagodanoye, OOO Limanskoye, ZAO Vostochnoye

Resorts and tourism

Factors that make an industry attractive for investment

Part of the district's territory lies along the coast of the Azov Sea, serving as a local sea-side resort for preventive healthcare, recreation, and tourism. In the summer, this area is popular among families with kids. A key advantage of the district is the absence of polluting industries.

The largest enterprises of the industry

Individual entrepreneurs represent the health resort complex of the district.

Competitive advantages

Geographical location

- Part of the district’s territory lies along the coast of the Sea of Azov
- The district is a coastal resort with a focus on preventive healthcare, recreation, and tourism, mainly for children and families in the summer.

Mineral and raw material resources

- There are no mineral or raw material deposits in the district.
- A key advantage of the area is the absence of polluting industries.

Environmental and climatic conditions

- Winter is mild, without extreme cold temperatures.
- By mid-April, the weather becomes hot, and occasionally, the air temperature can reach up to +86 °F (+30 °C).
- Summer arrives in early May, characterized by hot and arid weather, often experiencing droughts.
- Autumn is a lengthy and warm season, with lots of sunny days.

Success stories

Building a parallel milking parlor for 64 cows

Investor
Znamya Lenina SPK (collective farm)

Implementation timeline:
2023

Volume of investments:
71 mln. rubles

Number of new jobs:
10

In 2023, as part of the investment project at the collective farm Znamya Lenina, a milking parlor for 64 cows was built in Scherbinovsk District. The agricultural sector focuses on upgrading and expanding dairy farming. In the same year, the collective farm, recognized as one of the top performers in both Scherbinovsk District and the Krasnodar Territory, made significant strides in the dairy industry. Currently, the dairy farms produce 140 tons of milk daily.
